

Overview: C. da Cotogna

A unique renovation, consisting of two buildings facing each other across a stone courtyard, to be developed into a distinctive country residence.

This property consists of two buildings which sit within an attractive location, facing each other across a highly desirable, original stone courtyard. They will be converted and restored to form a large kitchen and dining area on one side and generous sleeping and living accommodation on the other. The two sides will be linked by a covered walkway.

This unusual property is set in a rural plot, yet is within easy reach of S. Michele Salentino and the historic towns of Ceglie and Ostuni.
